

Winter Weather

Keeping Your Home Clear of Carbon Monoxide

Winter is the peak season for carbon monoxide incidents. Anytime a portable heating device or wood-burning stove is in use, the possibility of carbon monoxide exposure increases. The following safety tips will keep you and your family protected from carbon monoxide throughout the winter weather season.

- Have your home heating system checked each year by a professional technician prior to their first use.
- Install carbon monoxide detectors throughout your home and replace the batteries each year.
- Ensure your chimney and fireplace are clear of obstructions.
- Allow for adequate ventilation in your home by ensuring windows, fans and other vents function properly.
