* Total returns reflect that the investment adviser waived all or part of its fee or reimbursed the fund for a portion of its expenses. Otherwise, total returns would have been lower.

**Results for the life of the fund, if the fund does not have 10-years of performance history

Important Disclosures

The intent of this chart is to reflect what the performance of a hypothetical investment in the sub-accounts of Spectrum Select Plus would have been, had they been in existence since the inception date of the underlying funds selected. Spectrum Select Plus has been available for sale since November 1, 1999. The inception date of the LLAC Variable Account used to fund benefits payable under Spectrum Select Plus contracts is July 10, 1998. The Variable Account is divided into sub-accounts, the assets of which are invested in shares of the corresponding underlying funds. **This information is based on past performance and is not a guarantee or an indication of future results. Current performance may be lower or higher than the performance results shown. For the most recent month-end performance data, please contact our Service Center at 1-800-451-7065 ext. 36203.**

Footnotes

1. The performance results shown are adjusted to reflect mortality and expense charges, and investment management fees and other expenses of the underlying funds. Actual results would be significantly lower after deducting other applicable contract expenses including cost of insurance, administrative and withdrawal charges. A complete description of the contract charges can be found in the contract prospectus.
2. Total return is the change in value of a sub-account over a given period, assuming reinvestment of any dividends and capital gains distributions of the underlying funds. Average annual return is a hypothetical rate of return that, if achieved annually, would have produced the same results over the stated period if performance during that period was constant. Average annual returns smooth variations in performance, and are not the same as actual year-by-year results.
3. Inception date refers to the start of investment operations of the underlying funds. The fund prospectuses are available upon request.
4. Based on the seven-day period ending June 30, 2014. Seven-day current SEC yield is a hypothetical rate of return for an investment in the Contract's money market Sub-account(s) over the specified seven-day period with dividends annualized. Investment in a money market fund is not insured by the FDIC or any other government agency, and although the underlying fund seeks to preserve a constant share price of \$1.00 per share, it is possible to lose money by investing in the money market sub-account as a result in a change in the underlying fund's share price or the deduction of contract charges.
5. Three-month return is cumulative not annualized.

Contact Liberty Life Assurance Company of Boston's Service Center to obtain a personalized illustration which reflects the mortality and expense, cost of insurance, administrative and withdrawal charges applicable to your contract.
